Altair 5000

Lumen 5000 | IP 20

Art. no. 690000659

Narrow light dispersion | High color rendering index RA 95 | Neutral colour temperature | Stand included

Altair 5000 provides a very narrow light dispersion and is specifically designed to detect irregularities in filler and painting work indoors. Altair 5000 is powered by a power cable and can be used with or without the included stand.
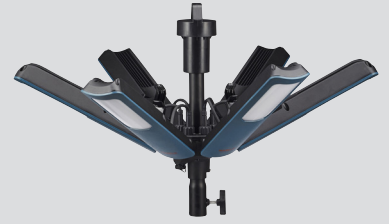

Sirius 30000

Lumen 37000 | IP 65

Art. no. 690000658

Extremely powerful light | Dimmable | Compatible with Casambi app | Can be connected in series

Sirius 30000 features an extremely powerful light with fantastic light diffusion, perfect for illuminating larger areas. The lamp is robust and designed with a modular concept, making it easy to mount multiple lamps on the same stand when a lot of light is needed. Can be controlled with the Casambi app.

Suitable accessories Stand, cable for series connection.

Starburst 23000 APP & SENSOR

Lumen 23000 | IP 65

Art. no. 690000732

Six adjustable light sources | AC-powered | Very powerful light | App-controlled with sensor

Starburst 23000 App & Sensor features six adjustable light sources for flexible, bright, and glare-free (frosted glass) lighting. It comes with a control box with an app and motion sensor included. It can also be controlled via the Mesh Lamp app. The lamp is designed for use with a stand. Its foldable design ensures easy and safe transportation.

Suitable accessories Stand.

Starburst 45000 APP & SENSOR

Lumen 45000 | IP 65

Art. no. 690007166

Six adjustable light sources | AC-powered | Extremely powerful light | App-controlled with sensor

Starburst 45000 App & Sensor features six adjustable light sources for flexible, extremely powerful, and glare-free (frosted glass) lighting. It comes with a control box with an app and motion sensor included. It can also be controlled via the Mesh Lamp app. The lamp is designed for use with a stand. Its foldable design ensures easy and safe transportation.

Suitable accessories Stand.

Vapor 6500

Lumen 6500 | IP 54

Art. no. 690000591

Three adjustable light sources | Foldable for easy transportation | Extra power outlet | AC-powered

Vapor 6500 features three adjustable and dimmable light sources that provide fantastic, almost glare-free light thanks to the frosted casing. You can choose to have one, two, or all three of the light sources turned on. Vapor 6500 also includes an extra power outlet. The lamp folds easily after use for protected and convenient transportation. Works best when used with a stand.

Suitable accessories Stand.

Vapor 10000

Lumen 10 000 | IP 54

Art. no. 690000617

Three adjustable light sources | Foldable for easy transportation | Extra power outlet | AC-powered

Vapor 10000 features three adjustable and dimmable light sources that provide fantastic, almost glare-free light thanks to the frosted casing. You can choose to have one, two, or all three of the light sources turned on. Vapor 10000 also includes an extra power outlet. The lamp folds easily after use for protected and convenient transport. Works best when used with a stand.

Suitable accessories Stand.

Vapor 20000 APP & SENSOR

Lumen 20000 | IP 65

Art. no. 690012109

Three adjustable light sources | AC-powered | Very powerful light | Foldable for easy transportation | App-controlled with sensor

Vapor 20000 App & Sensor features three adjustable and dimmable light sources that provide fantastic, almost glare-free light thanks to the frosted casing. The lamp is dimmable and equipped with a motion sensor for automatic on/off functionality. It can also be controlled using the Mesh Lamp app. A control box is included. The lamp folds easily after use for protected and convenient transport. Works best when used with a stand.

Suitable accessories Stand.

Blaze 3500

Lumen 3500 | IP 54 | Battery time 2 h

Art. no. 690002253

Extremely impact resistant | Good, directional light | AC- and battery powered

Blaze 3500 is a flexible and robust work lamp with excellent directional light. It can be powered both by cable (included) and battery (sold separately). The lamp is equipped with a detachable magnet.

Suitable accessories Battery, stand.

Blaze 6000

Lumen 6000 | IP 54 | Battery time 1 h

Art. no. 690002302

Extremely impact resistant | Strong, directional light | AC- and battery powered

Blaze 6000 is a flexible and robust work lamp with excellent directional light. It can be powered both by cable (included) and battery (sold separately). The lamp is equipped with a detachable magnet.

Suitable accessories Battery, stand.

Blaze 6500 DP

Lumen 6500 | IP 40/54 | Battery time 2-10 tim

Art. no. 690002302

Can be powered by power tool batteries | Extremely impact-resistant | Strong, focused light | Adapters included

Blaze 6500 Dp can be powered by 18V power tool batteries from the most common models on the market (such as Milwaukee, DeWalt, Bosch, and Makita). The lamp has an impact-resistant and robust construction, making it extremely durable. It can also be powered by the included cable for mains power. The lamp is rated IP40 when used with power tool batteries and IP54 when used with a cable. The lamp is dimmable.

Suitable accessories Stand.

Canopus 5000 RE APP

Lumen 5000 | IP 65 | Battery time 3-15 h

Art. no. 690011101

Extremely impact resistant | High colour rendering index of 95 | Adjustable colour temperature | Rechargeable and AC-powered | App-controlled

Canopus 5000 Re App is an extremely robust work lamp that is rechargeable but can also be powered by cable (included). Features such as stepless adjustment of warm and cool light, dimming capability, and high colour rendering index make it a very versatile work lamp. It can be controlled using the Mesh Lamp app.

Suitable accessories Magnet, universal adapter, stand.

Shine 4500 RE APP

Lumen 4500 | IP 65 | Battery time 6-10 h

Art. no. 690000815

Extremely impact resistant | Omni-directional light | Rechargeable and AC-powered | App-controlled | Long operating time

Shine 4500 Re App is an extremely robust spherical work lamp that provides 360° light dispersion. The lamp is rechargeable with a long operating time but can also be powered by cable (included). Equipped with an emergency light battery to ensure illumination in case of power outage. Shine comes with a hook for hanging and threaded screw holes for mounting on a stand. It can be controlled using the Mesh Lamp app.

Suitable accessories Stand, universal adapter.

Shiny 5000 RE APP

(Lumen 5000) (IP 65) (Battery time 3-18 h)

Art. no. 690000823

Rechargeable and AC-powered | App-controlled | Clamp for easy mounting | Dimmable at 100% and 50% | Foldable for easy transport

Shiny 5000 Re App is an extremely impact resistant work lamp equipped with a strong clamp, allowing easy attachment to scaffolding, machinery, etc. The lamp is rechargeable but can also be powered by cable. It can be controlled using the Mesh Lamp app.

Suitable accessories Universal adapter.

Capella 2000 RE

(Lumen 2000) (IP 54) (Battery time 3-12 h)

Art. no. 690000229

Rechargeable | Compact | Extremely impact resistant | Dimmable | Adjustable colour temperature | Equipped with magnet

Capella 2000 Re is a compact, rechargeable, and extremely robust work lamp with many features; adjustable colour temperature, and dimmable in six modes including solid and flashing red light. It also features a magnet and power bank function.

Suitable accessories Stand.

Flash 3000 RE WR

(Lumen 3000) (IP 65) (Battery time 3-12 h)

Art. no. 690000203

Rechargeable | Extremely impact resistant | Dimmable | Adjustable colour temperature

Flash 3000 Re Wr is a compact, rechargeable, and extremely robust lamp that is ideal for tasks requiring a lot of light but in limited spaces. With adjustable colour temperature and five lighting modes, Flash is as versatile as it is compact.

Suitable accessories Magnet, wireless charging station, stand.

## Lyra 1000 RE

(Lumen 1000) (IP 65) (Battery time 3-12 h)

Art. no. 690005103

Rechargeable | Extremely impact resistant | Magnet for smart mounting | Handy size | Four lighting modes

Lyra 1000 Re is a very handy and compact lamp that is easy to carry at all times. The lamp is rechargeable and has four different light modes. Lyra is equipped with a magnet for easy mounting.

Spica 1000 RE

(Lumen 1000) (IP 66) (Battery time 7,5-25 h)

Art. no. 690000161

Rechargeable | Long battery time: 7.5 hours at 100% | Adjustable warm/cool light | Small, fits in pocket

Spica 1000 Re is a small and handy lamp that fits in your pocket to always be within reach. Extremely long battery time and the ability to adjust warm and cool light are two other positive features. Equipped with a magnet

Suitable accessories Micro USB cable.

What does it mean?

Lumen
Lumen describes how much light is radiated by a light source in all directions. This is a good way of measuring how much light you get from a lamp. For comparison, a car with good dipped headlights is approx. 1200–1500 lumen. A mobile phone delivers approx. 50 lumen.

IP-rating
IP stands for Ingress Protection and describes degrees of protection for enclosures and casings. By assigning different numerical codes, the product's degree of protection can be identified quickly and easily. In the code IP 65, the 6 (6/6 = dust tight) describes the level of protection against solid objects and the 5 (5/8 = protected against water jets) describes the level of protection against liquids. In other words, IP 65 can handle harsh outdoor environments and the Nordic climate.

Blaze 6500 ^{DP}

Can be powered both with a cable and with the included adapters for power tool batteries.

LED strips

A popular and important category of products that is becoming more common, thanks especially to its practicality and lighting benefits. Our LED strips are available in different lengths and designs to accommodate all types of workplaces and situations. The strips can be connected in series up to 60 meters, (100 meters if you use Sunlit flicker-free driver). All models are IP 65 rated to withstand outdoor and other harsh environments.

Sunlit Slim LED strip 25 m with cable reel

(Lumen/m 600)   (IP 65)   (Effect W/m 6)

Art. no. 690010717

Easy to roll in and out | Simple and convenient to handle | Can be connected in series up to 60m | Energy-efficient, 100 lm/W

With the Sunlit cable reel, it's easy to carry, roll out, and roll up your LED strip. Sunlit Slim LED strips are very easy and convenient to handle thanks to their slim design. They are highly energy-efficient (100 lm/W). The LED strips can be connected in series up to 60 meters with a standard power cable and up to 100 meters with the Sunlit flicker-free driver. Delivered with a power cable.

Suitable accessories Sunlit flicker-free driver, Sunlit LED dimmer, emergency light battery

Sunlit Slim LED strip 10 m

(Lumen/m 600)   (IP 65)   (Effect W/m 6)

Art. no. 690010253

Simple and convenient to handle | Can be connected in series up to 60m | Energy-efficient, 100 lm/W

Sunlit Slim LED strips are very easy and convenient to handle thanks to their slim design. They are highly energy-efficient (100 lm/W). The LED strips can be connected in series up to 60 meters with a standard power cable and up to 100 meters with the Sunlit flicker-free driver. Power cable is bought separately.

Suitable accessories Sunlit flicker-free driver, Sunlit LED dimmer, emergency light battery, power cable, mounting hooks, cable ties.

Sunlit Slim LED strip 20 m

(Lumen/m 600)   (IP 65)   (Effect W/m 6)

Art. no. 690010252

Simple and convenient to handle | Can be connected in series up to 60m | Energy-efficient, 100 lm/W

Sunlit Slim LED strips are very easy and convenient to handle thanks to their slim design. They are highly energy-efficient (100 lm/W). The LED strips can be connected in series up to 60 meters with a standard power cable and up to 100 meters with the Sunlit flicker-free driver. Power cable is bought separately.

Suitable accessories Sunlit flicker-free driver, Sunlit LED dimmer, emergency light battery, power cable, mounting hooks, cable ties.

Sunlit Proline LED strip 25 m with cable reel

| Lumen/m 1300 | IP 65 | Effect W/m 10 |

Art. no. 690010716

Easy to roll in and out | Extremely robust and durable | Can be connected in series up to 60m | Energy-efficient, 129 lm/W

With the Sunlit cable reel, it's easy to carry, roll out, and roll up your LED strip. Sunlit Proline LED strips are extremely robust and durable, and with their 180 LEDs, they provide a powerful yet pleasant light. The LED strips can be connected in series up to 60 meters with a standard power cable and up to 100 meters with the Sunlit flicker-free driver. Delivered with a power cable.

Suitable accessories Sunlit flicker-free driver, Sunlit LED dimmer, emergency light battery

Sunlit Proline LED strip 20 m

| Lumen/m 1300 | IP 65 | Effect W/m 10 |

Art. no. 690010451

Extremely robust and durable | Can be connected in series up to 60m | Energy-efficient, 129 lm/W

Sunlit Proline LED strips are extremely robust and durable, and with their 180 LEDs, they provide a powerful yet pleasant light. The LED strips can be connected in series up to 60 meters with a standard power cable and up to 100 meters with the Sunlit flicker-free driver. Delivered without a power cable.

Suitable accessories Sunlit flicker-free driver, Sunlit LED dimmer, emergency light battery, power cable, mounting hooks, cable ties.

Sunlit Green LED strip 5 m

| Lumen/m 600 | IP 65 | Effect W/m 6 |

Art. no. 690010505

Green light for marking emergency exits | Compatible with all Sunlit LED strips

The Sunlit Green LED strip is primarily designed for marking emergency exits on construction sites. It is very easy and convenient to handle thanks to its slim design. Delivered without a power cable.

Suitable accessories Sunlit flicker-free driver, Sunlit LED dimmer, emergency light battery, power cable, mounting hooks, cable ties.

Sunlit LED strip frosted 10 m

| Lumen/m 600 | IP 65 | Effect W/m 6,2 |

Art. no. 690010905

Provides a glare-free light | Neutral colour temperature | Energy efficient, 90 lm/W | Very durable | Can be connected in series up to 60m

Sunlit frosted LED strips provide glare-free light that is gentle and doesn't strain the eyes. They are excellent for general lighting on construction sites where people spend long periods of time. The strips are very durable and can be connected in series up to 60 meters using regular power cable and 100 meters with the Sunlit flicker-free driver. Power cable is bought separately.

Suitable accessories Sunlit flicker-free driver, Sunlit LED dimmer, emergency light battery, power cable, mounting hooks, cable ties.

Head lamps

When you need to use both hands in dark environments, on action packed adventures or in tight spaces, it is particularly important that the lights don't let you down. Our head lamps are designed together with trade professionals and elite athletes. So we can confidently promise that we know what is required and that you can rely on our head lamps in wet, dry, cold, steep, large and small conditions.

Gleam 200

(Lumen 200)   (IP 64)   (Battery time 7-14 h)

Art. no. 690001060

Powered by AAA batteries | Lightweight and compact | Focused light | Multiple lighting modes

Gleam 200 is a lightweight and compact headlamp that easily fits in your pocket for quick access. It provides focused light and offers several light modes. It has a range of 85 meters. The lamp is powered by AAA batteries.

Gleam 450

(Lumen 450)   (IP 64)   (Battery time 2-6 h)

Art. no. 690001086

Powered by AAA batteries | Lightweight and convenient | Wide, glare-free light | Multiple lighting modes

Gleam 450 is a powerful headlamp with multiple light modes that can easily be adjusted to your needs. It also features a red warning light. The inside is rubber-coated for a secure fit on the head or helmet. The lamp is powered by AAA batteries.

Gleam 600 RE

(Lumen 600)   (IP 66)   (Battery time 3-6 h)

Art. no. 690000336

Hybrid | High color rendering index RA 90 Wide, glare-free light | Multiple lighting modes

Gleam 600 Re provides a wide, glare-free light pattern, making it ideal for close-range work. It is a rechargeable headlamp that can also be powered by standard alkaline batteries. With a color rendering index of RA 90, it enhances color contrast for better visibility. A versatile headlamp that is comfortable and easy to work with.

What does it mean?

Hybrid

Lamps with a hybrid function are possible to use both with lithium batteries and with regular alkaline batteries. This is a smart feature to have when the rechargeable battery is dead and you still is in urgent need of use the lamp.

GoPro compatible

Headlamps that are GoPro compatible can use the same accessories that are available for GoPro. It means that there is a huge range of helmet mounts, bike mounts etc. to choose from as an accessory for your lamp.

Go Home

Lamps with Go Home function does not abruptly go out when the battery runs out. Instead it dims down to approximately 100 lumens and maintains that level for at least an hour. This enables you to complete what you are doing or ensure that you have enough light to get home.

FitGo

FitGo Technology has developed a way to quickly and conveniently adjust the size of the headband. By screwing on the knob on the headband the size is easily adjusted without having to remove the lamp from your head.

Stellar 250

Lumen 250 | IP 64 | Battery time 2-14 h

Art. no. 690001318

Powered by AAA batteries | On/off sensor | Focused and diffused light | Equipped with magnet

Stellar 250 is a convenient and robust headlamp powered by AAA batteries. The lamp features two light sources, one for focused light and one for diffused light, providing a total of 4 lighting modes. It has a range of 30 meters. Stellar 250 is easy to detach from the headband and has a magnet on the back.

Stellar 550 RE

Lumen 550 | IP 64 | Battery time 2,5-10 h

Art. no. 690001326

Rechargeable | Hybrid-powered | On/off sensor | Focused and diffused light | Equipped with magnet

Stellar 550 Re is a convenient and robust hybrid headlamp that is rechargeable and can also be powered by AAA batteries. The lamp features two light sources, one for focused light and one for diffused light, providing a total of 4 lighting modes. It has a range of 55 meters. It comes with a wide headband with silicone strips for secure attachment to a helmet. Stellar 550 Re is easy to detach from the headband and has a magnet on the back. A plastic bracket and 3M adhesive pad for easy mounting on a helmet is included.

Stellar 750 RE

Lumen 750 | IP 66 | Battery time 3-8 h

Art. no. 690001334

Rechargeable | Focused and diffused light | On/off sensor | GoPro mount | Range 85 m

Stellar 750 Re is a convenient, robust, and rechargeable headlamp. It features two light sources, one for focused light and one for diffused light. It offers a total of 5 lighting modes plus red light. It has a of 85 meters. It comes with a wide headband with silicone strips for secure attachment to a helmet. It is supplied with a GoPro mount, adhesive pad, and plastic bracket for easy mounting on a helmet. It is highly waterproof with an IP rating of 66.

Tellus 1000 RE

Lumen 1000 | IP 65 | Battery time 2,5-40 h

Art. no. 690001400

Rechargeable | Powerful light | Long operating time | Range 125 m | GoPro mount

Tellus 1000 Re is developed in Sweden and equipped with highly energy-efficient LED diodes, providing longer battery life of up to 40 hours. The Go Home function provides an additional 1 hour of runtime. Tellus has powerful light output and can provide both focused and wide beam patterns. It has a range of 125 meters. Supplied with a GoPro mount for easy attachment to helmets and other devices. The swivel buckle, FitGo, on the headband makes size adjustment very easy.

Nova 1500 RE

Lumen 1500 | IP 67 | Battery time 1-8 h

Art. no. 690001750

Rechargeable | Headlamp and flashlight in one | Small and compact | Extremely waterproof | Range 150 m

Nova 1500 Re is a compact powerful, and rechargeable multi-lamp that can be used as both a headlamp and a flashlight. The lamp is dimmable with four light modes. It has a range of 150 meters.

Orion 2500 RE

Lumen 2500 | IP 65 | Battery time 1,5-20 h

Art. no. 690090204

Rechargeable, long operating time | Powerful light | Two light modes, 100% and 50% | Go-home function, 1 hour | Range 100 m

Orion 2500 Re is designed for activities and tasks that require strong light and/or long battery time depending on the selected light mode. It features a go-home function for one hour of low-power light when the battery is low. The lamp provides a very wide field of view with warm and comfortable light that minimizes glare and reflections. It has a range of 100 m and is rechargeable, with the battery located in the headband. A quick-release mount for GoPro is included.

Suitable accessories Fast charger, remote control, helmet mount.

Torches and hand lamps

A flashlight with a range of 300 meters or a rechargeable handheld lamp that easily fits in your pocket? When it comes to the areas of use for our handheld range, only your imagination sets the limits. What they all have in common is, of course, high light quality, smart features, and long durability. They are Mareld, after all.

Art. no. 690001700

Compact and convenient size | Powered by AAA batteries | Zoom function | Multiple light modes

Nimbus 140 is a small and handy flashlight powered by AAA batteries. The lamp is convenient to carry as it easily fits in a pocket or can be attached to a belt or similar with the clip. It features two light modes plus strobe and a zoom function. Range 60 m.

Suitable accessories Holster.

Nimbus 500

(Lumen 500) (IP 65) (Battery time 2,5-5 h)

Art. no. 690001805

Powered by AA batteries | Zoom function | Multiple light modes | Range 200m

Nimbus 500 is a robust and efficient flashlight powered by AA batteries. With three different light modes, you have the best conditions for working and operating. It also features a zoom function. Range 200 m.

Nimbus 600 RE

(Lumen 600) (IP 65) (Battery time 4-9 h)

Art. no. 690001813

Rechargeable | Zoom function | Two light modes + strobe | Range 200m

Nimbus 600 Re is a robust and rechargeable flashlight that covers most needs. The lamp features two light modes plus strobe and a zoom function. Range 200 m.

Suitable accessories Holster.

Nimbus 1200 RE

(Lumen 1200) (IP 65) (Battery time 2-5 h)

Art. no. 690001550

Rechargeable | Powerful light | Durable | Zoom function | Multiple light modes | Range 300m

Nimbus 1200 Re is a bright, robust and rechargeable flashlight in a compact format that meets most needs, even in situations where a lot of light is required. It features two light modes plus strobe and a zoom function. Range 300 m.

Suitable accessories Holster.

Nimbus 6000 RE

(Lumen 6000) (IP 54) (Battery time 2-8 h)

Art. no. 690004098

Rechargeable | Durable | Very powerful light | Zoom function | Two light modes + strobe | Range 200m

Nimbus 6000 Re is a very bright, robust and rechargeable flashlight designed for tasks and activities that require a lot of light. The lamp features three light modes and a zoom function. Range 200 m.
Illumine 1200 RE

(Lumen 1200) (IP 67) (Battery time 1,5-10 h)

Art. no. 690005046

Rechargeable | Equipped with clips for easy handling | Extremely waterproof | Two magnets | Three lighting modes plus top light

Illumine 1200 Re is a powerful, durable, and rechargeable handheld lamp. Its compact and slim design makes it very convenient to carry in a pocket or attach to a belt or similar with the clip. The lamp features three light modes plus a top light. Extremely waterproof, IP67. Range 48m.

Radiate 300 RE

(Lumen 300) (IP X0) (Battery time 2-6 h)

Art. no. 690001053

Rechargeable | Equipped with magnet and clip | Small and convenient

Radiate 300 Re is a compact and handy rechargeable penlight that provides a bright 300 lm light. It features two light modes: a 300 lm main light and a 180 lm top light (flashlight). The runtime is 2 hours for the main light and 3 hours for the top light. Battery capacity: 3.7V, 650 mAh. Equipped with a magnet and clip for easy attachment.

Giga 800 RE

(Lumen 800) (IP 54) (Battery time 3-6 h)

Art. no. 690004098

Rechargeable | Highly shock-resistant and compact | Equipped with magnet | Three light modes + top light

Giga 800 Re is a rechargeable and compact handheld flashlight with 800 lm, designed for professional users. It is highly shock-resistant and durable. It offers three light modes: 100%, 50%, and 10%, plus a top light. The flashlight comes with a 3.7V 2600 mAh battery, and there is an option to purchase a stronger battery with higher capacity, 3.7V 3500 mAh.

Suitable accessories Battery 3,7 V 3500 mAh

Giga 1000 RE

(Lumen 1000) (IP 54) (Battery time 3-6 h)

Art. no. 690000544

Rechargeable | Highly shock-resistant and compact | Equipped with magnet | Three light modes + top light

Giga 1000 Re is a rechargeable and compact handheld flashlight with 1000 lm, designed for professional users. It is highly shock-resistant and durable. It offers three light modes: 100%, 50%, and 10%, plus a top light. The flashlight comes with a 3.7V 2600 mAh battery, and there is an option to purchase a stronger battery with higher capacity, 3.7V 3500 mAh.

Suitable accessories Battery 3,7 V 3500 mAh

Illumine 1200 RE

A small "pocket-sized" handheld lamp with clips and two magnets.

Accessories

Is there any better feeling than when everything just works? Seamless integration between tools and work lights, with minimal cable clutter and battery crises. Our accessories will help you create the perfect set-up for any workplace. Choose from emergency light batteries, cables, chargers, magnets and stands to find a mix that makes your Mareld brand products even better.

Sunlit LED dimmer

Art. no. 690001505

The Sunlit LED dimmer is a product that combines both a dimmer and an electrical socket in one. By dimming the lighting when no one is working, significant energy savings can be achieved on the construction site. The dimmer is compact and flexible, and it is compatible with all Sunlit strips. Light intensity can be easily adjusted manually on the dimmer. The dimmer levels are 25%, 50%, 75%, and 100%.

Sunlit flicker-free driver 250W

Art. no. 690001506

A driver for flicker-free light of the highest quality with high technical performance. Connect the driver to LED strips to achieve flicker-free lighting and a healthier working environment. The driver can support LED strips up to 60 meters in length. With the driver connected, energy consumption is also reduced.

Sunlit flicker-free driver 400W

Art. no. 690001450

A driver for flicker-free light of the highest quality with high technical performance. Connect the driver to LED strips to achieve flicker-free lighting and a healthier working environment. The driver can support LED strips up to 100 meters in length. With the driver connected, energy consumption is also reduced.

**Battery
Powerstation** 300 W

Art. no. 690040209

Powerstation 300 W has a battery capacity of 296 Wh. Charging an iPhone requires approx. 10 Wh. You can charge up to 30 iPhones with Powerstation 300 W. Charging one of the largest hand tool batteries requires 100Wh. You can charge up to 3 of the largest hand tool batteries with Powerstation 300 W. A Starburst 23000/Vapor 20000 can be operated for approx. 1.5 h with
300 W.

**Battery
Powerstation** 1000 W

Art. no. 690040308

Powerstation 1000 W has a battery capacity of 1100 Wh. Charging an iPhone requires approx. 10 Wh. You can charge up to 30 iPhones with Powerstation 1000 W. Charging the largest hand tool battery from Makita requires 100 Wh. You can charge up to 10 of the largest hand tool batteries with Powerstation 1000 W. A Starburst 23000/Vapor 20000 can be operated at full power for 5.5 h with 1000 W.

We are Mareld

Whatever the activity – carpentry, painting, assembling, repairing, casting, digging, running, biking or climbing – you want your performance to be as close as possible to perfection. That's why all our products are created for one purpose: To allow you to do your very best work under live conditions – when the light turns on.

Our history began with an understanding that today's mobile work lights are often poor and can cause a lot of damage. But if the need for better work lighting was the spark, then our motivation to contribute to better performance was the fuel.

Everything happens when the light turns on.

MARELD
PRO LIGHTING®

Visit mareldprolighting.com for more inspiration and information about our products and mobile work lighting.
