CREATED IN CLOSE COLLABORATION WITH DEMANDING USERS

From Sweden for Nordic requirements

The new Zone Series™ by Zekler consists of three lightweight helmets with unique features. All helmets have been developed in close collaboration with the construction sector and industries across Sweden. Our user surveys show that accessory compatibility, high comfort and low weight are decisive factors when choosing a safety helmet. Robustness and durability are also important. We've listened to the users. Zone Series™ is packed with these characteristics. It's an extraordinary series, designed for demanding craftsmen and workers.

4 DECISIVE FACTORS WHEN CHOOSING A SAFETY HELMET*

*SURVEY AMONG CONSTRUCTION AND INDUSTRIAL WORKERS, MANTAP JUNE 2020

PREMIUM HELMETS FOR PROFESSIONALS

High quality safety helmets are non-negotiable when working under hazardous conditions. Choose from three smart, safe, and comfortable helmets for your needs and requirements.

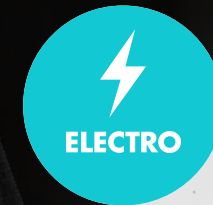

ZONE STANDARD

Dual certification for use on the ground and at heights.

ZONE MIPS

Equipped with Mips® Safety System for extra protection against angled impact.

ZONE ELECTRO

Electrically insulated for use in low voltage environments (1000 VAC).

INTEGRATED MIPS® SAFETY SYSTEM*

CLICK MOUNT FOR HEADLAMP (WITHOUT VISOR)

12 VENTILATION HOLES**

ZEKLER

CLICK MOUNTS FOR HEARING PROTECTION

CLICK MOUNT FOR HEAD LAMP (WITH VISOR)

UPGRADE WITH APPROVED HEARING PROTECTION

All Zekler hearing protection for helmets are co-certified for seamless use with Zone Series™

CLICK MOUNTS FOR VISOR AND VISOR COVER

VISOR COVER

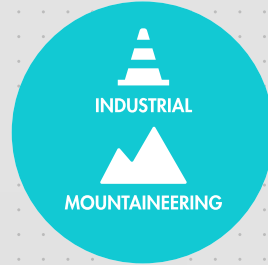

INTERCHANGEABLE CHIN STRAP AND PADDING

ELECTRICALLY INSULATED AND APPROVED FOR 1000 VAC***

*Only available on Zone Mips. **Only available on Zone Standard and Zone Mips

***Only available on Zone Electro.

Zone Standard is packed with smart features including integrated click mounts for headlamp, hearing protection, visor, visor cover and neck protector. Thanks to an adjustable headband, Zone Standard fits all head shapes and sizes. It also features a clever padding design, interchangeable chin straps and twelve ventilations holes in the outer shell. All in all, Zone Standard is easy to use all day, every day, without reducing your working capacity.

- ▶ Dual certification in compliance with EN 397 and EN 12492 standards
- ▶ Ideal for use at construction sites and in industries, and for mountaineering
- ▶ Comfortable to use and easy to upgrade
- ▶ Integrated click mounts for accessories
- ▶ Adjustable size from XS to XXL

Dual certification for use on the ground and at heights

WHAT IS MIPS?

Mips specialises in helmet-based safety and brain protection. Today, Mips is the world-leader in this area. Their unique and patented Mips® Safety System features a low friction layer inside the helmet between the head and the outer shell. The layer allows a multi-directional movement of 10-15 mm on certain angled impacts. The purpose is to reduce the harmful rotational motion that may affect the brain if you fall or receive a strike to the head. The Mips system is designed to reduce rotational energies, which in turn can lower the risk for concussion or other brain injuries. The Mips technology is based on more than 20 years of research and development together with KTH Royal Institute of Technology and the leading medical university Karolinska Institutet in Stockholm.

ZEKLER × 

ZONE MIPS

A safety innovation from Zekler and Mips

ZEKLER × Mips

Major construction companies often require the Mips® Safety System. Zekler has integrated the technology in Zekler Mips, an innovative helmet for construction and industrial work that is designed to provide the head with extra protection against harmful rotational motions. We've integrated a patented low friction layer from Mips between the head and the outer shell. In addition to a world-class safety system by Mips, Zone Mips also has 12 ventilation holes and smart click mounts for head lamp, hearing protection, visor, visor cover and neck protection.

- ▶ Certified in compliance with the EN 397 standard for construction and industrial work
- ▶ Integrated Mips® Safety System for extra protection
- ▶ Low-friction layer between head and helmet
- ▶ Integrated click mounts for accessories
- ▶ Adjustable size from XS to XXL

ZONE MIPS

Next level safety for construction sites

**ZONE ELECTRO
WILL LAUNCH
DURING 2022**

As the name suggests, Zone Electro is an electrically insulated safety helmet used for electrical installations and other tasks that place high demands on the safety of the electrician. In other words, Zone Electro provides protection against electrical shock and prevents electrical current from passing through your head. For this reason, the helmet has no ventilation holes and no electrically conductive parts. Zone Electro is approved for electrical work in low voltage environments up to 1000 V (AC) and 1500 V (DC).

- ▶ Certified in compliance with EN 397 and EN 50365 standards
- ▶ Electrically insulated and approved for 1000 VAC
- ▶ No electrically conductive parts
- ▶ Solid outer shell minimises the risk for accidents
- ▶ Integrated quick mounts for accessories
- ▶ Adjustable size from XS to XXL
